Election/Restrictions

1. Newly submitted claims 27-37 are directed to an invention that is independent or distinct from the invention originally claimed for the following reasons: Method claims

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims 27-37 withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1, 5-10 and 16-19 stand rejected under 35 U.S.C. 102(b) as being anticipated by O'Grady.

O'Grady teaches a game comprising a game board having general scoring area (col.3, lines 7-9), one or more blocking pieces (lower disc and upper disc, see col3, lines

Art Unit: 3711

57-59), pieces are tossed on the game board (col.1, lines 56-57), pieces and board having magnets for mutual attraction (abstract), teaching further structural layers for construction of magnetic board as means for attachment and magnetic pieces (col.2, lines 42-68), projectiles of any shape col.3, line 34).

4. Claim 20 stands rejected under 35 U.S.C. 102(b) as being anticipated by Christian.

Christian teaches a game board for one or more receiving pieces (14) in a scoring area (col.4, lines 20-24), blocking and scoring pieces (col.3, lines 47-49), receiving, blocking and scoring pieces having magnets (abstract).

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 11-15 stand rejected under 35 U.S.C. 103(a) as being unpatentable over O'Grady in view of Stuart.

O'Grady teaches all limitations of these claims except that it does not explicitly teach hook and loop attachment means. Stuart in a similar game teaches hook and loop arrangement (Fig.1). In order to attach pieces it would have been obvious to use any attachment means such as shown by Stuart. One of ordinary skill in art at the time the invention was made would have used hook and loop attachment means.

Response to Arguments

7. Applicant's arguments filed 1/29/03 have been fully considered but they are not persuasive. Applicant's arguments pertain to playing of the game and not towards limitations of the claimed apparatus.

In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
